

Bayer CropScience and Netafim™ USA are teaming up to deliver a one–two punch against yield-busting nematodes with the **Precise Defense Program**.

New Precise Defense Program

Velum® One Nematicide

- Proven nematode suppression in almonds
- Increase canopy area and trunk growth in new almond plantings²
- Increase yields by an average of 18% in California almond trials³

Netafim Precision Drip Irrigation Technology

- Delivers Velum One directly to the root zone
- Maximizes residual efficacy through uniform application rates

Aligns with Almond Board of California Almond Orchard 2025 Sustainability Goals

- Using Bayer’s Soil Nematode Analysis Program (SNAP) growers are fulfilling the goal of implementing precision diagnostic technology to increase the adoption of environmentally friendly pest management tools by 25%
- Grower investment in cutting edge technology from Netafim improves irrigation uniformity, a major factor in reducing the amount of water used to grow a pound of almonds by 20%

Nematodes Impact **50%** of California’s Almond Acres¹

Negative Impacts of Nematodes

Program Qualifications and Rebates

To Qualify for Rebates:

Purchase a complete **Netafim Dual Line Drip Irrigation System** from an authorized dealer **and** purchase two annual applications of Velum One from an authorized retailer to **Earn Rebates**

***Earn \$20 Rebate/Acre** from Netafim USA for Dual Line Drip Irrigation System

***Earn \$20 Rebate/Acre** from Bayer CropScience for 2 applications of Velum One

EARN \$40/Acre*

Visit precisedefense.com for offer details and to see if you qualify.
