

The Bayer Commitment to Helping You Grow On

At the heart of our efforts in partnering with you is a commitment to three core areas in which we believe our products can have the greatest impact on agricultural sustainability:

Plant Health Improvement

Unique products that promote plant health for improved nutrient and water uptake and disease resistance

Biodiversity Preservation

Newer, safer formulations that target pests, help preserve beneficials and manage resistant diseases

Farm Safety

Innovative portfolio, including products with fewer restrictions, that can help reduce applications and lower worker exposure

Innovative Solutions for Citrus

Empowering growers to steward the lands that feed society.

You work hard to build the farms that sustain us all, ensuring a safe, nutritious and affordable food supply for a growing global population.

Profitable farms are vital for food security and prosperous societies, and these farms can continuously strengthen their operations and steward the environment to ensure sustainable farming for generations to come.

With modern agricultural methods, we can achieve greater yields from existing farmland and steward healthy ecosystems.

At Bayer, we want to partner with you to Grow On by helping to identify, apply and communicate sustainable farm practices.

Partnering Together for Sustainable Citrus

WATER

BAYER SOLUTIONS

Optimize plant water usage and quality

- Suppress nematode populations, which, if left unchecked, can damage a tree's root system and impair water uptake. Trees develop healthier roots and use water more efficiently to increase harvestable produce and potentially lower annual water applications.
- Eliminate tough weeds that directly compete with a crop for precious water resources.
- Help plant roots gain the mass and depth they need to improve water uptake and better deal with drought stress.

Movento[®] insecticide and Velum[®] nematicides

Alion[®] and Rely[®] 280 herbicides

Serenade[®] and Aliette[®] fungicides

BIODIVERSITY

BAYER SOLUTIONS

Use Integrated Pest Management to manage pests with minimal environmental impact

- Stay in harmony with Integrated Pest Management practices by using products that target pests with minimal impact on beneficial insects.
- Promote a balanced ecosystem by controlling resistant weeds.
- Consider alternative biological modes of action to combat resistant diseases and lower overall chemistry load.
- Take advantage of flexible application timings for at-bloom and pre-harvest applications, which allow season-long pest and disease control with minimal impact on beneficials and pollinators.
- Activate a plant's natural defenses to induce systemic responses, which increases the plant's ability to overcome adverse environmental factors.

Movento and Sivanto[™] insecticides

Alion and Rely 280 herbicides

Serenade fungicide

Serenade fungicide, Sivanto insecticide

Serenade and Aliette fungicides, Admire[®] Pro insecticide

FOOD WASTE

BAYER SOLUTIONS

Reduce food waste, prevent pre-harvest loss and extend post-harvest shelf life

- Reduce fruit drop by combating the bacterium-transmitting insect behind citrus greening disease (HLB).
- Lower the risk of pre-harvest fruit drop by targeting citrus canker.

Movento, Admire Pro and Sivanto insecticides

Serenade and Aliette fungicides

SOIL HEALTH

BAYER SOLUTIONS

Improve soil health and plant nutrient uptake

- Improve root nutrient uptake and suppress nematode populations, which can severely degrade root health.
- Increase fertilizer available for plant uptake by reducing weed competition.
- Reduce soil compaction by utilizing chemigation to lower annual grove field passes.
- Reduce soil compaction by utilizing efficacious products to lower annual grove field passes.

Movento insecticide, Velum nematicides

Alion and Rely 280 herbicides

Serenade and Aliette fungicides, Admire Pro and Sivanto insecticides, Velum nematicides

Alion herbicide, Admire Pro and Movento insecticides, Luna[®] fungicides

GREENHOUSE GASES

BAYER SOLUTIONS

Lower GHG emissions and fuel use

- Reduce equipment passes and spray applications by delivering crop protection through pre-existing irrigation systems.
- Cut down on total field applications and equipment passes with products that have strong residual power.

Serenade and Aliette fungicides, Admire Pro and Sivanto insecticides, Velum nematicides

Alion herbicide, Admire Pro and Movento insecticides, Luna fungicides

LABOR

BAYER SOLUTIONS

Ensure safe work environments

- Get the convenience and safety of 12-hour re-entry intervals and non-restricted chemistry.
- Work more efficiently with four-hour re-entry intervals and zero-day pre-harvest intervals.
- Avoid the extra oversight of a certified applicator by using non-restricted use products.
- Utilize products that received EPA's "Reduced Risk" designation, which indicates "less risk to human health and the environment than existing conventional alternatives".*
- Increase labor safety with the easyFlow closed filling and cleaning system. Bayer developed easyFlow in collaboration with agrotop GmbH to help small-scale growers reduce worker exposure to crop protection products and minimize the risk of unintentional product spills.
- Apply products that have the "caution" signal word (lowest required signal word) and have indications of low acute toxicity.

Alion herbicide

Serenade fungicide

Movento insecticide, Velum nematicides

Admire Pro, Movento and Sivanto insecticides

easyFlow

Admire Pro, Movento and Sivanto insecticides, Luna and Serenade fungicides, Velum nematicides
