

Empowering growers to steward the lands that feed society.

The Bayer Commitment to Helping You Grow On

At the heart of our efforts in partnering with you is a commitment to three core areas in which we believe our products can have the greatest impact on agricultural sustainability:

Plant Health Improvement

Unique products that promote plant health for improved nutrient and water uptake and disease resistance

Biodiversity Preservation

Newer, safer formulations that target pests, help preserve beneficials and manage resistant diseases

Farm Safety

Innovative portfolio, including products with fewer restrictions, that can help reduce applications and lower worker exposure

Innovative Solutions for Tree Nut Crops

You work hard to build the farms that sustain us all, ensuring a safe, nutritious and affordable food supply for a growing global population.

Profitable farms are vital for food security and prosperous societies, and these farms can continuously strengthen their operations and steward the environment to ensure sustainable farming for generations to come.

With modern agricultural methods, we can achieve greater yields from existing farmland and steward healthy ecosystems.

At Bayer, we want to partner with you to Grow On by helping to identify, apply and communicate sustainable farm practices.

Visit GrowOn.Bayer.us for more information

IMPORTANT: This bulletin is not intended to provide adequate information for use of these products. Read the label before using these products. Observe all label directions and precautions while using these products.

Partnering Together for Sustainable Tree Nuts

WATER	BAYER SOLUTIONS
<p>Optimize plant water usage and quality</p> <ul style="list-style-type: none"> • Suppress nematode populations, which, if left unchecked, can damage a tree's root system and impair water uptake. Trees develop healthier roots and use water more efficiently to increase harvestable produce and potentially lower annual water applications. • Eliminate tough weeds that directly compete with a crop for precious water resources. • Help tree roots gain the mass and depth they need to improve water uptake and better deal with drought stress. 	<p>Movento® insecticide and Velum® nematocides</p> <p>Alion® and Rely® 280 herbicides</p> <p>Serenade® fungicide</p>

BIODIVERSITY	BAYER SOLUTIONS
<p>Use Integrated Pest Management to manage pests with minimal environmental impact</p> <ul style="list-style-type: none"> • Stay in harmony with Integrated Pest Management practices by using products that target pests with minimal impact on beneficial insects. • Promote a balanced ecosystem and control resistant weeds. • Reduce overwintering diseases, create a more robust spring orchard and control increasingly resistant strains of Alternaria late blight. • Consider alternative biological modes of action to combat resistant diseases and lower overall chemistry load. • Take advantage of flexible application timings for at-bloom and pre-harvest applications, which allow season-long pest and disease control with minimal impact on beneficials and pollinators. • Activate a tree's natural defenses to induce systemic responses, which increases the tree's ability to overcome adverse environmental factors. 	<p>Movento insecticide, Sivanto insecticide (not labeled for almonds)</p> <p>Alion and Rely 280 herbicides</p> <p>Luna® fungicides</p> <p>Serenade fungicide</p> <p>Serenade fungicide, Sivanto insecticide (not labeled for almonds)</p> <p>Serenade fungicide, Admire® Pro insecticide</p>

GREENHOUSE GASES	BAYER SOLUTIONS
<p>Lower GHG emissions and fuel use</p> <ul style="list-style-type: none"> • Reduce equipment passes and lower annual fuel consumption with chemigation-compatible products. • Utilize high-efficacy products to lower annual spray applications and fuel consumption. 	<p>Velum nematocides, Serenade fungicide, Admire Pro insecticide</p> <p>Admire Pro and Movento insecticides, Alion herbicide, Luna fungicides</p>

SOIL HEALTH	BAYER SOLUTIONS
<p>Improve soil health and plant nutrient uptake</p> <ul style="list-style-type: none"> • Improve root nutrient uptake by suppressing nematode populations, which can severely degrade root health. • Increase fertilizer available for tree uptake by reducing weed competition. • Reduce soil compaction by utilizing chemigation to lower annual orchard spray applications. • Reduce soil compaction by utilizing efficacious products to lower annual orchard spray applications. 	<p>Movento insecticide, Velum nematocides</p> <p>Alion and Rely 280 herbicides</p> <p>Velum nematocides, Serenade fungicide, Admire Pro insecticide</p> <p>Admire Pro and Movento insecticides, Luna fungicides, Alion herbicide</p>

LABOR	BAYER SOLUTIONS
<p>Ensure safe work environments</p> <ul style="list-style-type: none"> • Get the convenience and safety of 12-hour re-entry intervals and non-restricted chemistry. • Work more efficiently with four-hour re-entry intervals and zero-day pre-harvest intervals. • Avoid the extra oversight of a certified applicator by using non-restricted use products. • Utilize products that received EPA's "Reduced Risk" designation, which indicates "less risk to human health and the environment than existing conventional alternatives".* • Apply products that have the "caution" signal word (lowest required signal word) and have indications of low acute toxicity. • Increase labor safety with the easyFlow closed filling and cleaning system. Bayer developed easyFlow in collaboration with agrotop GmbH to help small-scale growers reduce worker exposure to crop protection products and minimize the risk of unintentional product spills. 	<p>Alion herbicide</p> <p>Serenade fungicide</p> <p>Movento insecticide, Velum nematocides, Rely 280 herbicide</p> <p>Movento insecticide and Sivanto insecticides</p> <p>Admire Pro, Movento and Sivanto insecticides, Luna and Serenade fungicides, Velum nematocides</p> <p>easyFlow</p>
