<ul style="list-style-type: none">• Brassica, leafy greens• Bulb vegetables• Cucurbits• Dry and succulent beans• Grapes• Hops• Okra• Stone fruit• Sunflowers• Tree nuts	<ul style="list-style-type: none">• Alternaria• Anthracnose• Black rot• Botryosphaeria• Botrytis• Brown rot blossom blight and fruit rot• Cercospora• Cladosporium• Gummy stem blight• Jacket rot• Powdery mildew• Purple blotch• Rust• Scab• Sclerotinia• Septoria• Shot hole• Sour rot• Stemphylium

See product label for a complete list of crops and diseases.

/// BENEFITS

- **Exceptional Efficacy** – Proven in field trials to provide the broadest spectrum disease control equal or superior to all current leading fungicides.
- **Systemic Movement** – Uniform uptake after application enables Luna Experience to enter buds, blooms and new tissue.
- **Extended Protection** – Demonstrated improvements in long-term tree health and on fruit quality and storability.

/// LUNA EXPERIENCE[®] QUICK FACTS

- **Active Ingredients:** Fluopyram and Tebuconazole
- **Signal Word:** Caution
- **FRAC:** Group 7 and 3 Fungicide
- **REI:** 12 hours (except grapes)
- **Use Rate:** 6 to 17 oz./A, depending on crop

/// FIGHTING RESISTANCE

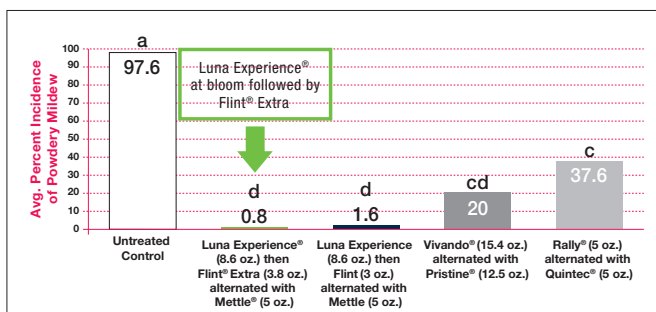

Luna Experience contributes to resistance management by containing two modes of action as well as offering an excellent rotational fit with other available fungicides.

- Use Luna Experience at bloom followed by Flint[®] Extra plus a tankmix partner for effective control of Powdery mildew and Botrytis on grapes.

/// BETTER DISEASE CONTROL AND YIELDS

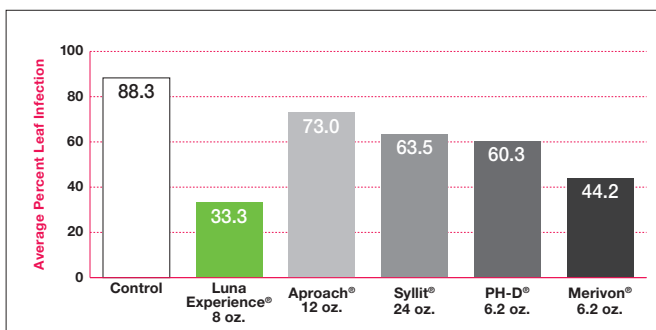

Luna Experience® provides unprecedented control of some of the most problematic fungal diseases to help growers achieve high yields and the best quality possible of fruits, nuts and vegetables.

In Grapes,
Luna Experience®
Followed by
Flint® Extra Helped
Control Powdery
Mildew to Trace
Levels.

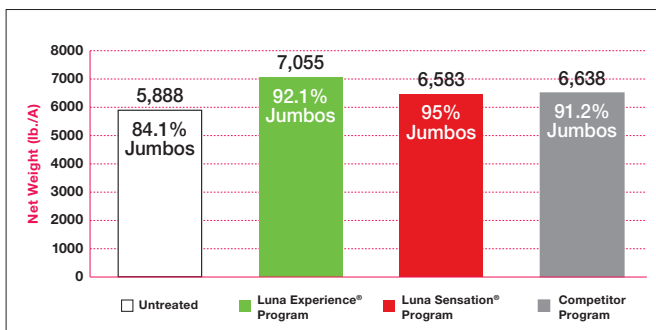

Trial conducted near Walnut Grove by UCCE, University of California, Davis, 2016. Rates are on an oz. per acre basis. All treatments with adjuvant (not shown). Applications on 14-day interval. Bayer programs began with Microthiol® Dispers® 5 lb. up to bloom on 7-day interval. Other programs were alternated full season.

In Almonds,
Luna Experience®
Provided Outstanding
Control of
Alternaria Leaf Spot.

Applications April and May 2016 in Colusa County, CA, conducted by Dr. Jim Adaskaveg. Treatments were applied using an air-blast sprayer at a rate of 100 gal./A.

In Walnuts,
Luna Experience®
Provided a Net Weight
of 7,055 lb./A with
92.1% Jumbos.

Yield (lb./Acre) and percent jumbos in a university/grower large plot trial at Modesto, CA, 2014. Andy Alderson (Modesto Junior College) and Dr. Themis Michailides. Tulare variety, planted 2004. Applications on 4/16, 5/15, 6/25, 7/25 and 10/30. Harvest on 9/29. Plots 11 rows, 2 rows harvested per plot.
