

Luna[®] SENSATION

Luna Sensation[®] Fungicide

Group 7 | 11 Fungicide

/// INTRODUCTION TO LUNA SENSATION[®]

Luna Sensation[®] is a well-trusted, broad-spectrum solution from Bayer. Effective on a wide range of crops and working within plants through systemic movement, Luna Sensation controls the most problematic diseases.

/// KEY CROPS	/// KEY DISEASES
<ul style="list-style-type: none"> • Artichokes • Berries • Brassica vegetables • Carrots • Citrus • Cucurbit vegetables • Fruiting vegetables • Grapes • Hops • Leafy vegetables • Pome fruit • Root vegetables • Stone fruit • Tree nuts 	<ul style="list-style-type: none"> • Alternaria • Anthracnose • Bitter rot • Botryosphaeria • Botrytis • Brown rot blossom blight • Cercospora • Cherry leaf spot • Fly speck • Greasy spot • Hull rot (suppression) • Lettuce drop • Melanose • Peach leaf curl • Penicillium • Petiole blight • Phomopsis • Post-bloom fruit drop • Powdery mildew • Rhizopus • Rust • Scab • Sclerotinia • Septoria • Shot hole • Soft rots • Sooty blotch • Stemphylium • Target spot • White rot

See product label for a complete list of crops and diseases.

/// BENEFITS

- **Exceptional Efficacy** – Proven in field trials to provide the broadest spectrum disease control equal or superior to all current leading fungicides.
- **Systemic Movement** – Uniform uptake after application enables Luna Sensation to enter buds, blooms and new tissue.
- **Extended Protection** – Demonstrated improvements in long-term tree health and on fruit quality and storability.

/// RESISTANCE MANAGEMENT

Luna Sensation contributes to resistance management by containing two modes of action as well as offering an excellent rotational fit with other available fungicides.

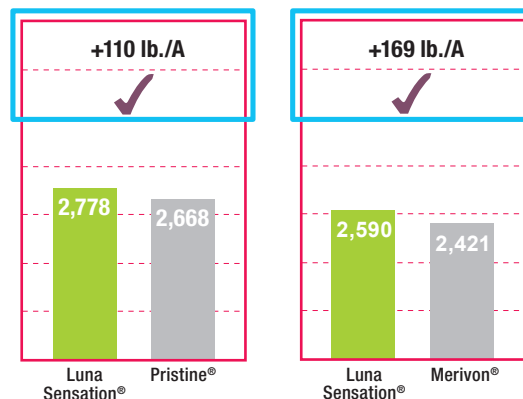

/// TREE HEALTH

- In tree crops, applications have been proven to reduce disease in the following season by reducing pathogen overwintering.
- Excellent disease control in tree crops helps the tree to retain leaves later through the fall leading to better leaf flush and bloom the following year.

/// HARVEST QUALITY AND STORABILITY

- **High Produce Quality at Harvest** – Crops such as pome and stone fruit have a lower incidence of fruit finish diseases and rots compared with standard fungicides.
- **Cleaner Fruit Going into Storage** – Luna Sensation applied at standard mid-season timings will reduce disease long after harvest. Cleaner, healthier fruit going into storage can reduce losses later.

Luna Sensation® at Bloom Supports High Yields in Almonds

Average almond nut meat yield lb./A in trials comparing:
 Luna Sensation to Pristine – 2013–2014 (24 trials)
 Luna Sensation to Merivon – 2015–2017 (28 trials)

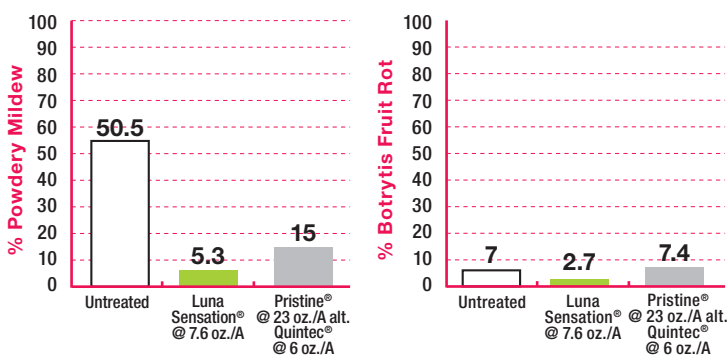

/// BETTER DISEASE CONTROL AND YIELDS

Luna Sensation® provides excellent control of some of the most problematic fungal diseases to help growers achieve high yields and the best quality possible of fruits, nuts and vegetables.

/// LUNA SENSATION® QUICK FACTS

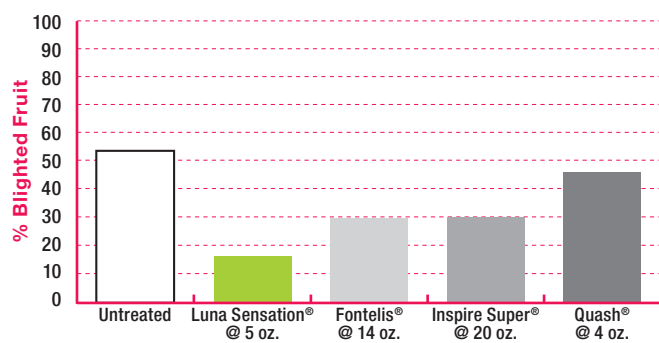

- **Active Ingredient:** Fluopyram and Trifloxystrobin
- **FRAC:** Group 7 and 11 Fungicide
- **Signal Word:** Caution
- **REI:** 12 hours
- **Use Rate:** 3 to 7.6 oz./A, depending on crop

Outstanding Powdery Mildew and Botrytis Control in Strawberries

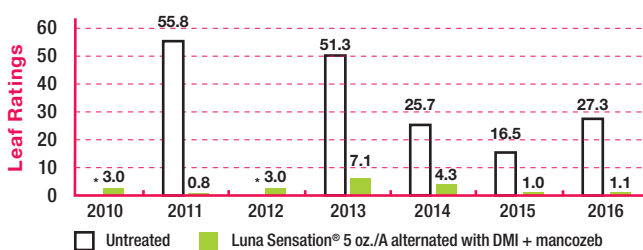

A research trial was conducted by Dr. Richard Hurstak, Aromas, CA, 2014. Diseases rated six days after final application.

Excellent Control of Botryosphaeria Blight in Pistachios

Trial by Dr. Themis Michailides, UC, Davis, in Butte County, CA, 2011. Four applications were made beginning at full bloom.

Proven Powdery Mildew Control with Luna Sensation® Program in Apples

Trials conducted by Dr. Pscheidt and Dr. Bassinette, Oregon State University, Corvallis, OR.
 *Powdery mildew leaf ratings in untreated plots not possible in 2010 and 2012 due to scab damage.

Luna Sensation® Controls Lettuce Drop

Trial conducted by Dr. White, Bayer, Yuma, AZ, 2015. Treatments were applied at thinning (41 days after planting). Disease rated as dead plants per plot.
