

Balance[®] flexx

APPLICATION GUIDELINES

Leave nothing to chance. When it comes to your corn it pays to be certain.

That's why Balance Flexx early season corn herbicide protects yields from the start by providing tough, broad-spectrum weed control on contact, then reactivating to kill late-emerging weeds.

- Balance[®] Flexx herbicide provides burndown of a broad spectrum of grass and broadleaf weeds, and then reactivates with just a half-inch or more of rain to control late-emerging weeds up to 2 inches tall.
- With its CSI[™] Safener technology, Balance Flexx can be applied from pre-plant through V2 on any soil type, including sandy soils.
- Because of its low use rate, Balance Flexx can be applied at ounces per acre vs. pints or quarts per acre required with other herbicides.
- Balance Flexx includes an HPPD mode of action and has no demonstrated commercial resistance worldwide.
- Use Balance Flexx as the foundation for a two-pass herbicide program.
 - In a sequential program, use Balance Flexx followed by Ignite[®] herbicide, Laudis[®] herbicide, glyphosate or other postemergence herbicides.

How to spray

Rate	3 to 6 fl oz/A depending on soil type
Timing	<ul style="list-style-type: none"> • Pre-plant (surface-applied or incorporated) through 30 days prior to planting¹ • Pre-plant burndown • Early postemergence through V2 corn
Adjuvants	<ul style="list-style-type: none"> • Crop Oil Concentrate (COC) or Methylated Seed Oil (MSO) • Do not use COC or MSO for early post applications
Tankmix Partners²	<ul style="list-style-type: none"> • Atrazine (pre- or postemergence) • Ignite herbicide • Laudis herbicide • Glyphosate

¹Balance Flexx may be applied up to 30 days prior to planting when used in a planned sequential application program, such as Balance Flexx followed by Ignite, Buctril[®] herbicide or other post-applied herbicides.

²See label for full listing of tankmix partners.

Balance Flexx is labeled to control more than 59 grass and broadleaf weeds, including woolly cupgrass, common ragweed, Palmer amaranth and other weeds exhibiting resistance to glyphosate, PPO, triazine and ALS herbicides.

Grass Weeds Controlled

Barnyardgrass	Goosegrass
Crabgrass, large	Johnsongrass, seedling
Crabgrass, smooth	Panicum, fall
Cupgrass, woolly ¹	Panicum, Texas
Foxtail, bristly	Proso-millet, wild ¹
Foxtail, giant	Sandbur, field ^{1,2}
Foxtail, green	Shattercane ^{1,2}
Foxtail, robust purple	Signalgrass, broadleaf ¹
Foxtail, robust white	Witchgrass ³
Foxtail, yellow ¹	

Broadleaf Weeds Controlled

Amaranth, Palmer	Nightshade, eastern black
Buffalobur	Nightshade, hairy ³
Burcucumber ²	Pennycress, field
Buttercup, small flower	Pepperweed, Virginia
Carpetweed ³	Pigweed, prostrate
Chamomile spp.	Pigweed, redroot
Chickweed, common	Pigweed, smooth
Cocklebur ^{4,5}	Plantain, broadleaf
Copperleaf, Hophornbeam	Purslane, common
Dandelion, seedling	Radish, wild
Deadnettle, purple	Ragweed, common
Galinsoga	Ragweed, giant ^{2,4}
Henbit ²	Shepherdspurse
Jimsonweed	Smartweed, Pennsylvania
Kochia	Spurge, toothed
Lambsquarters, common	Sunflower, wild ^{4,5}
Mallow, Venice	Thistle, Russian
Marestail	Velvetleaf
Morningglory, annual ^{4,5}	Waterhemp, common
Mustard, wild	Waterhemp, tall
Nightshade, black	

¹May require the addition of a pre-emergence grass herbicide tankmix partner or an appropriate postemergence herbicide application for control of late-season escapes.

²Partial control.

³Requires addition of pre-emergence grass herbicide.

⁴May require a postemergence application of Buctril, Laudis or other appropriate postemergence herbicides.

⁵Requires the addition of atrazine or premixes containing atrazine.
