

SEASON-LONG WEED MANAGEMENT TAILORED TO FIT YOUR NEEDS

A weed-control program can offer value, flexibility and broad-spectrum power. With the pre-emergence control of Balance® Flexx herbicide followed by Capreno® herbicide, you get season-long weed control that is customizable to your needs with flexible tankmix partners and application timings.

Layered Residuals

Use overlapping residual products to fend off weeds, enabled by flexible application timings

Weed Lockdown

Delivers excellent burndown and residual control of both grass and broadleaf weeds with multiple, effective sites of action to lock down weeds

Customizable Solution

Flexibly add tankmix partners pre- and post-emergence to implement customized weed management programs

A PROGRAM MADE TO FIT YOUR NEEDS

Balance Flexx followed by Capreno offers multiple conveniences while still delivering powerful weed control.

- **Wide application window** – Use overlapping residual products enabled by flexible application timings
- **Multiple sites of action** – Ability to develop strong weed management programs around three unique AI's with two effective sites of action to prevent resistance development
- **Tankmix flexibility** – Select the appropriate tankmix partner you need, such as glyphosate or atrazine, to customize your weed-control solution for specific fields

	FIRST PASS	SECOND PASS
Application Rate	3 to 6 fl oz/A*	3 fl oz/A
Timing	Burndown, pre-plant, pre-plant incorporated, pre-emergence, postemergence through V2	Corn up to 20 inches tall or up to V7 growth stage
SOA Groups	27	2 27
Recommended Tankmix Options	Atrazine ————— 5 Glyphosate ————— 9 Liberty® ————— 10 Harness®, Dual® ————— 15	DiFlexx® ————— 4 Atrazine** ————— 5 Glyphosate ————— 9 Liberty ————— 10
Benefits	<ul style="list-style-type: none"> • A cost-effective, flexible foundation that complements any herbicide program to protect yields from the start • Long-lasting residual control • Optimizes early weed control by killing tough grass and broadleaf weeds, including glyphosate, triazine, PPO and ALS-resistant weeds • Easily tankmixed with other herbicides, like a Group 15 	<ul style="list-style-type: none"> • Two effective sites of action (SOA) with both grass and broadleaf activity enable broad-spectrum weed control • Delivers foliar and residual control from both sites of action • Long-lasting residual control throughout the season • Can be paired flexibly with Liberty and Roundup® to further enhance weed control

*Depending on soil type and organic matter.

**Do not use atrazine if corn is greater than 12 inches tall.
