

SEASON-LONG WEED MANAGEMENT TAILORED TO FIT YOUR NEEDS

A weed-control program can offer value and broad-spectrum power. With the pre-emergence control of Balance® Flexx herbicide followed by DiFlexx® DUO herbicide, you get season-long weed control that is customizable to your needs with flexible tankmix partners and application timings.

Customizable Solution

Reliable weed-control foundation delivering burndown and residual activity on grass and broadleaf weeds with flexibility to add tankmix partners

Resistance Management

Adaptable resistance management built around three foundational Bayer active ingredients for control of resistant weeds (glyphosate, PPO, ALS, triazine, and auxin-resistant)

Weed Lockdown

Powerful postemergence selective corn herbicide (SCH) application (with two effective SOA) ensures control of potential escape weeds

A PROGRAM MADE TO FIT YOUR NEEDS

Balance Flexx followed by DiFlexx DUO offers you multiple conveniences while still delivering powerful weed control.

- **Tankmix flexibility** – Select the appropriate tankmix partner you need, such as glyphosate or atrazine, to customize your pest-control solution for specific fields
- **Liquid formulation** – Easier mixing and handling vs. dry formulations
- **CSI™ Safener technology** – Active for both soil and foliar uptake, giving you the flexibility to apply on any soil type with greater crop compatibility

Balance
flexx

DiFlexx
DUO

	FIRST PASS	SECOND PASS
Application Rate	3 to 6 fl oz/A	24 to 40 fl oz/A
Timing	Burndown, pre-plant, pre-plant incorporated, pre-emergence, postemergence through V2	Corn up to 36 inches or up to V7 growth stage for broadcast application; up to V10 for directed application
SOA Groups	27	4 27
Recommended Tankmix Options	Atrazine ————— 5 Glyphosate ————— 9 Liberty® ————— 10 Harness®, Dual® ————— 15	Atrazine* ————— 5 Glyphosate ————— 9 Liberty ————— 10
Benefits	<ul style="list-style-type: none"> • A cost-effective, flexible foundation that complements any herbicide program to protect yields from the start • Long-lasting residual control • Optimizes early weed control by killing tough grass and broadleaf weeds, including glyphosate, triazine, PPO and ALS-resistant weeds • Easily tankmixed with other herbicides, like a Group 15 	<ul style="list-style-type: none"> • Two powerful and effective sites of action (SOA) with a proven pedigree to take down tough-to-control weeds • Built-in resistance management for driver weeds • Excellent crop safety • Application window up to V10 to halt late-season weeds

*Do not use atrazine if corn is greater than 12 inches tall.
