

DIFLEXX[®] HERBICIDE IS AN IDEAL COMBINATION OF DICAMBA AND A HIGHLY EFFECTIVE CSI[™] SAFENER

Effective Weed Control

DiFlexx[®] is the only safened dicamba corn herbicide that can be used early season. It offers extremely fast and effective control of weeds.

Residual Control

DiFlexx stays active in the soil during the growing season, offering residual control of tough broadleaf weeds.

Excellent Crop Safety

The Crop Safety Innovation[™] (CSI) Safener enables corn plants to better withstand herbicidal activity, which can lead to increased root growth and plant health.

Crop Safety Innovation

- DiFlexx includes highly active CSI Safener technology that has both soil and foliar uptake.
- Because the safener is active in both pre- and post applications, DiFlexx can be used on any soil for greater crop compatibility and can be applied from burndown to V10.
- CSI Safener enables corn plants to better withstand herbicidal activity, which can lead to increased root growth and plant health.
- Because of the safener, DiFlexx can also be used on field corn, field corn grown for silage, white corn and seed corn.

Clarity® 16 oz/A, V4-V5 Application

Application Information

Group Number*	4 Auxin Receptor
Application Timing	Preplant up to V2, with application flexibility up to V10
Application Rate	6 to 24 fl oz/A depending on weed growth stages and weeds to be controlled/suppressed

*For more information on herbicide group numbers and site-of-action options, visit IWILLTakeAction.com

Key Weeds Controlled

Kochia	Pigweed
Lambsquarters	Ragweed
Marestail	Shepherdspurse
Morningglory	Velvetleaf
Nightshade	Waterhemp
Palmer amaranth
