Protection Starting at Planting

Gaucho® XT insecticide/fungicide seed treatment is a flowable low-dose, seed-applied, systemic flowable insecticide/fungicide for wheat, oats, rye and barley. It protects against a broad spectrum of insects and diseases and provides early season protection starting at planting, through emergence and well into stand establishment.

// KEY BENEFITS

• **Low-dose Insecticide/Fungicide**
  Proven, low-dose, seed-applied, all-in-one systemic insecticide/fungicide for wheat, oats, rye and barley

• **Long-lasting Insecticidal Protection**
  A "plant protectant" that delivers long-lasting insecticidal protection that moves within the plant tissues and protects against damage caused by aphids, wireworms and early season Hessian fly

• **Early Season Protection**
  Excellent disease tolerance package with the benefit of two fungicides for early season protection against Rhizoctonia, Pythium, Fusarium, root rots, smuts, and early season suppression of powdery mildew and leaf rusts
